🌱 Why VANI?

Not just a meme. Backed by a real vanilla farm in Medan.

✅ Real Land
✅ Real Plants
✅ Real Farmers
✅ Real Harvest Profit

📄 VANI Whitepaper

1. What is VANI?

VANI is a community token from Medan. 1 Token = Backed by a real vanilla farm. Not just a meme, there is real land, real plants, and real farmers.

2. From Planting To Harvest

Planting: Grown under shade trees, temperature 25-30°C. It takes 2-3 years until ready to flower.

Hand Pollination: Flowers only bloom for 1 day. If not pollinated that morning, the flower dies. Our farmers pollinate them one by one by hand every morning.

Fruit: After pollination, the fruit grows for 8-9 months on the vine.

3. Fermentation / Curing 3-6 Months

Green vanilla has NO smell. The aroma comes from fermentation:

a) **Killing:** Dip in 65°C hot water for 3 minutes
b) **Sweating:** Wrap in blankets for 24-48 hours, starts turning brown
c) **Drying:** Sun-dry in the morning, shade in the afternoon, 2-3 weeks
d) **Conditioning:** Store in sealed boxes for 3-6 months.

Total from flower to ready to sell: 12-15 months.

4. Roadmap

Phase 1 - Launch: Website, Telegram, First 100 holders community

Phase 2 - Launch on Solana: Official launch on Solana, 1000 holders, DEX Listing

Phase 3 - Build: Farm updates, community rewards, farm expansion

$VANI is a community token. Crypto is risky. DYOR.
